

... the current situation or "what is" (A),

... what you want the situation to be or "what might or should be" (B), and

... a plan for getting from where you are to where you want to be or
"feedback designed to reduce the gap" (A -> B = C).

- **what do I want to learn or understand better?**

A: I feel I have gotten a deeper understanding of react. Also has been starting to use node for the server. The use of scrum has gone smoothly so far.

B: I feel just as last week that I want to have more experience of react so that I can use it more efficiently in the future. But I also would like to learn a lot more about node

C: To reach this goal I would take the following measures:

- Read up on guides and videos online.

- **how can I help someone else, or the entire team, to learn something new?**

A: As I have implemented the server, I feel I have a great understanding on how it works. Which gives me an understanding of any problems other people may encounter.

B: The same as last week, I want to always be able to communicate the knowledge I have of a certain topic to the members of the group that does not have that knowledge so that they may be able to use that in the project and accelerate our progress.

C: The goal and means to complete it is still the same as last week.

- **what is my contribution towards the team's use of Scrum?**

A: This week I feel the planning of the project has gone smoothly and I feel we are prioritizing the things that PO wants the most.

I feel we are on the same page about MVP and “goldplating”.

B: For next week I feel we should work further on making our meetings more efficient by for example speeding up the user stories making part.

C: To reach this goal I would take the following measures:

- Help with setting up user stories to work towards for each sprint.
- Keeping up with the groups progress and discuss with the group the current progress if I believe it to be necessary.
- Trying to steer the team to focus on creating user stories and elimination side-tracks.

• **what is my contribution towards the team’s deliveries?**

A: I worked on the user navigation of the page and feel like the estimated timespan was correct. I now feel the page is more interactive and easier to use for the average user than before.

B: For next week I want to focus on making the website even more user friendly for both average and admin users.

C: To reach this goal I would take the following measures:

- Implementing the PO: s requests the most user-friendly way
- Improving preexisting features to be more user-friendly.
