Individual Reflections

2021-05-17

Felix Nilsson

Structure:

A: The current situation or "what is".
B: What you want the situation to be or "what might or should be".
A→B: A plan for getting from where you are to where you want to be or "feedback designed to reduce the gap.

- What do I want to learn or understand better?

  A: This week the focus was mostly bugfixes, and aside from that the addition of a small popup, replacing the activity name field, under "Available Locations". The bug fixing turned out to be harder than what I anticipated.

  B: The solution to the bug was that a window had to be re-rendered, which was not that weird of a fix according to William, who assisted on the bug fix.

  A→B: I need to do research on what rendering means for a website, and when it needs to be called. It could be the source of more bugs in the future.

- How can I help someone else, or the entire team, to learn something new? (Same as previous week)

  A: I try to keep up to date with the documentation of libraries we are working with, for example ant-design or bcrypt, to make sure that we first try to use components and tools from their api before we build something ourselves.

  B: Just continue improving, I still sometimes waste time on making my own solution when there are better ones readily available.

  A→B: By continuing to code and experiment you catch a lot of errors, and as time goes by you stop making the same mistakes, and you notice when other people make them.

- What is my contribution towards the team's deliveries?

  A: This week I worked on my own on a small visual update, as mentioned above, which I solved on my own.

  B: I want to become better at coding in JS, and gain more experience.

  A→B: Continue to pick user stories I feel confident that I can finish on my own, otherwise communicate with other teammates.

• What is my contribution towards the I team's use of Scrum?

 A: Whenever meetings stall, or the topic goes somewhere that is not related to what we need to be discussing, I try to direct it back to the correct topic.

 B: I think our meetings could be shortened or more effective.

A→B: Maybe scheduling a break would help people to be more concentrated during long meetings.
